Organization

Name	Asociación La Tierra Verde
Short description	La Tierra Verde Association is a Canary Islands non-governmental, non-profit organization founded in 2003. The Association works actually in the creaction of the Canarias Youth Council, the higher expression body of youth stakeholders in the region. The main objective of our association has been, since its creation, to raise awareness about the role that information and specifically environmental info can and should play in promoting people and active involvement in a broad spectrum of issues (of social, cultural, environmental, etc.), in diffusing and distributing updated and reliable information and in encouraging the utilization of information for the shaping of virtuous and socially viable behaviors. We are particularly interested too in the promotion of our patrimony protection and cooperate with many organizations.
